INFORMATION NOTE TO PARTIES AND OBSERVERS

Enhancements on the secretariat's main website

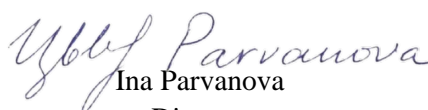

The secretariat of the United Nations Framework Convention on Climate Change, the Kyoto Protocol and the Paris Agreement is pleased to announce the implementation of enhancements to its main website <unfccc.int>. The enhancements include a fresh look and feel and a new set of content presentation options for improved usability.

The enhancements are the result of a thorough usability analysis and are the first step in a series of improvements of the website for COP 27 and beyond, in the areas of content, structure and functionality.

The overall aim of the enhancements is to achieve a highly usable, modern and fit-for-purpose platform that supports the intergovernmental process, engages stakeholders and inspires global climate action. As the website is a living product that evolves with the progress of the process, the secretariat is continuously working to refine and improve it.

The secretariat trusts that with these enhancements, Parties and observers can even more easily find and access public information, documents and other pertinent resources and thus use the website as an efficient tool in their work under the process.

Yours sincerely,

Ina Parvanova
Director

Communications and Engagement division

Distribution: To Parties and observer States to the United Nations Framework Convention on Climate Change through their national focal points and diplomatic missions accredited to the Federal Republic of Germany, as well as to United Nations organizations and admitted observer organizations.
